OVERVIEW

CI Arb and FTI Consulting are delighted to invite you to a training and networking session on **“Understanding Capital Markets: Getting to Grips with Financial Instruments”**

In this session, Financial Markets experts from FTI Consulting’s Global Capital Markets practice will cover the ‘need-to-know’ concepts for capital markets, specifically aimed at knowledge required by litigation and arbitration lawyers. The session will be followed by networking drinks.

This session will:

- Develop a practical knowledge and understanding of the general concepts underpinning the structuring, trading, valuation and risk measurement and risk management of financial instruments.
- Provide an overview of the market information, tools and valuation methodologies typically used in special situations such as contentious valuation disputes.

This will be a highly interactive presentation using case studies to demonstrate how concepts are put into action in the context of transactions, litigations, arbitrations, mediations and investigations. Participants are invited to send in questions in advance.
